The highest ACCELERATION for sports INNOVATION

SPIN Accelerator Italy

2019

#SPINItaly
spin-accelerator.com
Trentino Sviluppo, in collaboration with the University of Trento and the Israeli network HYPE - Sports Innovation, **hosts the first European sport-tech accelerator.**

HYPE - Sports Innovation is the biggest sports innovation ecosystem in the world, with more than 26 thousand members among which are sports clubs, brands, federations and academies, together with more than 8 thousand sports startups.

Trentino Sviluppo operates in collaboration with a number of other international hubs: National Chiao Tung University in Taiwan, Queensland University (AUS), MEF University/1907 Fenerbahce FC (TR), Shakhtar Donetsk FC (UA), Loughborough University London (GB), Maccabi HAIFA F.C. (ISR), FC Köln (DEU).
WHAT WE SEARCH FOR

1. EXCELLENT TEAMS WITH 2-TO-4 MEMBERS

2. A GREAT IDEA, NEW AND SCALABLE

3. PASSION, ENERGY AND WILL TO SUCCEED

4. SPORTS-ORIENTED TECHNOLOGICAL IDEAS
Sixteen weeks of industrial acceleration with top-notch mentors and top managers coming from sports multinationals, and the chance of continuing working on your project within Progetto Manifattura, the sport-tech and green-tech incubator of Trentino Sviluppo.

- **A unique training path** with a selection of the best world’s mentors
- **An equity-free 4-month acceleration program in our incubators**, an environment in great evolution
- **The chance to meet investors and sport-tech companies**
- **10K euros to make your idea grow** the winner of the 2019 edition will be granted a training path at Trentino Sviluppo and a prize of 10 thousand euros for the purchase of counselling and services (tied to the settlement in Progetto Manifattura)
The whole Trentino ecosystem for innovation will be at your disposal:

- PROGETTO MANIFATTURA
- POLO MECCATRONICA
- PROM FACILITY
- TESS LAB
Progetto Manifattura is an industrial innovation center that operates in the sectors of sustainable construction industry, renewable energies, sports and environmental technologies. It offers an environment designed for inspiring innovation and creativity and promoting sustainable growth - both in environmental, social and economic terms. It also plays a fundamental role in the Cluster Sport, the sport economy and sport-related technologies valorisation project. Such project is coordinated by the autonomous Province of Trento in collaboration with a number of universities and research centers.

progettomanifattura.it

Polo Meccatronica

An innovative and dynamic space in which enterprises, students and researchers project, produce and test solutions for the industry 4.0. The industrial and technical-scientific project of Polo Meccatronica is coordinated by a public/private task force with interdisciplinary competences. Such team, guided by the autonomous Province of Trento, is composed by the Bruno Kessler Foundation, the University of Trento, Confindustria Trento and the technical and professional institute CFP G. Veronesi.

polomeccatronica.it
It is at the ProM Facility laboratories of Polo Meccatronica, in Rovereto, that innovation finds its true shape. ProM employs cutting-edge machinery, unique in Italy, handled by a highly trained and qualified staff. It is a laboratory in which enterprises can transform their ideas into real products. These products can then be tested and researchers get the chance to conduct complex experiments. ProM Facility is sustained by European funds and was born from the collaboration between the Autonomous Province of Trento, Trentino Sviluppo, Bruno Kessler Foundation, the University of Trento and Confindustria Trento.

promfacility.eu

The TESS Lab laboratories will occupy an area of 600 square meters and will be structured around three main sectors, identified as strategic for the development of Progetto Manifattura: smart home, sustainable mobility and sports industry. TESS Lab will be a dynamic environment that will offer companies the chance to develop innovative projects thanks to top-notch technologies, products and materials. Through technology transfer, TESS Lab will facilitate the training of a new generation of students, able to face new challenges with a multidisciplinary approach.
THE FIRST EDITION

Ended in the summer of 2018, it has already given great results at a global level

WITHIN SPIN ACCELERATOR ITALY:

▷ 40 world-class mentors
▷ 130 training hours

WITHIN HYPE SPORTS INNOVATION’S NETWORK:
