

Fretless Idea

complete your picture

Fretless Idea, founded in 1999, started developing ICT products for the RAILWAY industry in 2004 and for the TELCO industry in 2006. Our services complement our products with **consultancy, system integration and customisation of our products..**

Fretless Idea has many years of succesful experience in IT support in the railway sector:

- business processes and data quality
- gathering and consolidation of **business and user requirements**
- train composition and message exchange with other business players
- personnel and engine planning and operations
- data warehouses and business intelligence
- wagon maintenance
- ... and more!

Fretless Idea has been hired by **UIC**. We supplied 100+ consultancy man-days in the Deployment Team of Common Component Group (**TAF-TSI**) on architecture and tests of **the Common Interface** Commission Regulation (EC) 62/2006

Fretless Idea has developed a software based on the requirements of the **ECM** Regulation (EU) 445/2011.

In our model, maintenance data is collect from the tracks and used both for workshop processes and for communication with ECMs.

Fretless Idea
